

GROUP 4: ASSETS WORTH LESS THAN \$2,200

Workshop 3: Our Choices

Alizeta

I am 16 years old and I live in Burkina Faso. Here in Burkina Faso we are suffering the worst effects of climate change. The land is very dry due to the decreasing rainfall which means the harvest is getting smaller each year. Families here survive on what we grow. We are getting poorer and are unable to afford school fees. Our living standards are constantly lowering.

[See Alizeta's video here](#)

"I belong to a club in school which raises awareness about these environmental challenges but I fear people will continue to suffer unless we all make big changes."

Burkina Faso?

What are the worst effects of climate change?

How do our actions in Ireland contribute towards climate change?

Are the effects evenly spread throughout the world?

How does what we buy affect the environment?
